

Lasershow Designer 2000

The world leader in creating and presenting laser shows

Laser beams and graphics add high-tech pure light energy to concerts, discos, and special events. And the secret behind the best shows is Pangolin's *Lasershow Designer 2000* system. It is the winner of 15 major awards for technical achievement, and is by far the most used laser program in the world.

LD2000 is so successful because it combines ease-of-use with sophisticated features. To get you started fast, it comes with 100 free shows and 275,000 animation frames. You can play these on dedicated CD or memory-card hardware players, or install *LD2000* software in your own Windows computer. To create your own shows, use *LD2000*'s graphic editor, or import Flash movies and 3D computer graphic animations from Autodesk *3Ds Max*.

LD2000 has the power to run complex shows as well. Multiple laser projectors, different scan areas, wireless networking — all are easy to set up.

Add-on hardware, such as the *Lasershow Performer* pictured above, lets you be a "laser DJ" with 1700 laser and DMX effects at your fingertips.

Service and support is the best in the industry. Software updates are free, so you will always have the latest version of the *LD2000* program at no extra cost. There's even a 90-day money-back guarantee, allowing you to try *LD2000* without risk.

If you want the magic of laser light for your audiences, come join the over 3800 users in 62 countries who rely on Pangolin's *Lasershow Designer 2000* to make the world's best laser shows.
